Consent:

Although exercise testing is a very safe procedure, adverse reactions including, but not limited to, chest pain, arrhythmia, and heart attack have been reported and can be expected to occur at a rate of up to 1 per 10 000 tests.

The test will be stopped by the technologist or physician if you are having significant difficulty and will be stopped immediately anytime at your request.

I understand fully what is involved and the risk. My signature acknowledges my voluntary consent to perform the test.
